Shamir Delgado.

Junior Full-Stack Developer · Web, 3D & Applied AI

PROFILE

Systems Engineering student who builds complete web products, from the database to the 3D interface. I design the architecture, write and review the code, and use AI assistants to speed up implementation, with tests and verification at every step. My background in logistics and hardware repair gave me discipline, precision and a methodical way of diagnosing problems.

PROJECTS

Pokiot `pokiot.vercel.app` 2026

Pokémon card tracker with an immersive 3D experience.

- 3D particle universe with custom GLSL shaders; daily card and evolution family generated by a Python pipeline on GitHub Actions with continuous deployment on Vercel.
- In-browser physical card scanner (Tesseract.js OCR + perceptual hashing) and Supabase accounts: PostgreSQL with Row Level Security and secure functions; price history with charts.
- Measured performance: initial load cut from 981 KB to 396 KB with code splitting; 6 to 60 FPS on mobile, debugged with CPU profiles (async shader compilation and a shared WebGL renderer).
- 9 playable pixel-art regions; 100+ automated tests, linting and visual checks on desktop and mobile.

`React 19 · Vite · Three.js · GSAP · Python · Supabase / PostgreSQL · GitHub Actions · Vercel`

Courier Demo `shamirdelgado.github.io/courier-demo` 2026

Demo platform for US → Costa Rica package forwarding businesses: customer portal, tax-aware shipping estimator, pre-alerts and package tracking, designed for small businesses.

`HTML · CSS · JavaScript · SEO · Responsive design`

Portfolio `shamirdelgado.github.io` 2026

Bilingual site with a Three.js 3D particle background, animated timeline, SEO and structured data.

`JavaScript · Three.js · HTML · CSS`

EXPERIENCE

Device hardware & software technician · Awápaz `2026 – present`

- Component-level diagnosis and repair (micro-soldering, voltage and current measurements) and OS installation and restoration.

Fuel station attendant · Gasolinera UNO `Oct 2025 – Jul 2026`

- Daily cash reconciliation against system reports, handling millions of colones.

Inventory & logistics assistant · Grupo Castro Fallas `Sep 2024 – Sep 2025`

- Digital inventory control, customs clearance of goods (DUAs) and inspection of international containers.

Internship · CargaloTodo USA `Sep – Dec 2024`

- Built and maintained the corporate website (HTML, CSS, JavaScript) and logistics data reports.

SKILLS

Languages
JavaScript, TypeScript, Python, SQL, HTML, CSS, C#

Frontend
React, Three.js / WebGL (GLSL), GSAP, Vite, responsive design

Backend & data
Supabase, PostgreSQL (RLS), SQLite, FastAPI

Tools
Git, GitHub Actions, Vercel, Linux, advanced Excel

Applied AI
Claude Code, Codex, reviewing generated code

Hardware
Component diagnosis, micro-soldering, multimeter

EDUCATION

Systems Engineering
Universidad Latina de Costa Rica · 2026 – in progress
Started the degree at Universidad Fidélitas (2024).

Phone software repair technician
Awápaz Aprendizaje · 2024

Intermediate phone repair technician
Awápaz Aprendizaje · 2023

High school diploma
CTP Máximo Quesada · 2024

LANGUAGES

Spanish (native) · English (B2)
